

# Works Notification

## This little inconvenience will bring big things

### Electrical upgrade works

### Brunswick Tram Depot, Cameron Street, Brunswick

January to May 2025

CitiPower is working with Yarra Trams and the Department of Transport and Planning (DTP) to support the upgrade of the Brunswick Tram Depot on Cameron Street in Brunswick.

#### Works

CitiPower is working with Yarra Trams and DTP to deliver the Brunswick Tram Depot upgrade project, which involves electrical works to accommodate upgraded tram infrastructure.

Our electrical works are scheduled to begin in January 2025 and involve relocating overhead and underground electrical assets to supply the upgraded depot.

Residents and businesses will be notified in advance of any scheduled interruptions to power supply.

#### When

These works will take place between January and May 2025.

Initial works involve investigations for design from January, with relocation works to occur closer to June 2025.

Using a **combination of day and night works**, we are aiming to complete these works with as little disruption to businesses and residents as possible.

CitiPower will provide further details on specific dates for the time and duration of works closer to the date of the works.

#### Access

There will be limited access along Cameron Street and adjacent streets during works.

**Traffic management will maintain local access where possible.**

Please allow for delays while our crews maintain access.

Pedestrian access will **always remain open.**

#### What to expect

- CitiPower crews scoping the work site in the new year ahead of works.
- Work crews operating at small work sites along Cameron Street throughout the duration of the project.
- Lane closures along Cameron Street corresponding with work crew locations for relocation works in June – traffic management in place.
- Localised footpath closures with alternative pedestrian detours in place.
- Increased noise and dust due to excavation works.
