Community Update 4

The Department of Transport and Planning (DTP) and Yarra Trams are upgrading the Brunswick Tram Depot to support the addition of larger trams to the fleet, additional trams in the depot and provide improved accessibility and safety.

New Brunswick Tram Depot car park complete

Construction of the new car park under the elevated rail line is now complete and in use by depot staff. We appreciate the community's patience while we undertook these works.

Next Steps

The old car park within the depot site will now be used for the installation of temporary facilities for the operations and administration of the depot. Works to install these temporary buildings, connect services and fit out have commenced. These works will have minimal impact to nearby properties. The temporary facilities are expected to be operational by February 2025.

Once operations and administration have shifted to the new temporary facilities, works will commence to upgrade the existing depot building. We will continue to provide community updates on these upcoming works.

We appreciate your patience during this important upgrade.
